

### Things I will learn:

- Make careful observations.
- Test out my ideas by planting seeds.
- Record my findings.
- Record my chosen method.
- Talk about my learning when creating a habitat.

Many changes happen in the natural world.

### Minibeasts

are invertebrates – they are creatures without backbones. So that includes insects, spiders, beetles, snails, worms, centipedes...

What do you think this minibeast grows up to be?

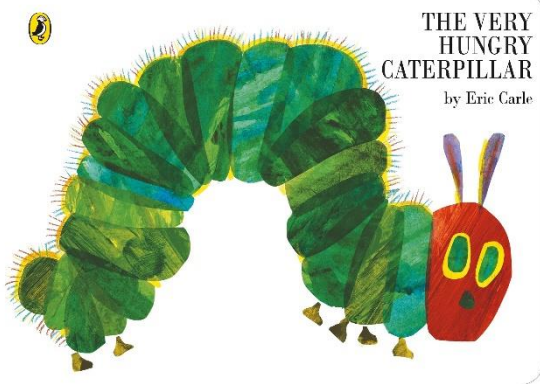

Ladybird

### Key Words:

Minibeast, insect, habitat, diet, caterpillar, butterfly, growing, chrysalis, larvae, segmented, legs, invertebrate, exoskeleton, food, life cycle

To help our plants to grow they will need water and sunshine alongside the nutrients from the soil/compost we planted them in.

You should end up with some lovely strawberries that you can enjoy and you can share with some Hungry Caterpillars.

What change happens to the Very Hungry Caterpillar?
